

Call for Papers

Communication and Information Systems Security Symposium

Symposium Co-Chairs

- Hongwei Li, University of Electronic Science and Technology of China, China - hongweili@uestc.edu.cn
- Jianbing Ni, Queen's University, Canada - jianbing.ni@queensu.ca
- Sandra Scott-Hayward, Queen's University Belfast, UK - s.scott-hayward@qub.ac.uk

Scope and Motivation

Owing to the unprecedented advancements in computation and communication technologies, the cyber-threat landscape has also drastically expanded. On the other hand, the inception of futuristic technologies such as the Internet of Everything, where low-cost resource-constrained devices are connected through the Internet, is a luring playground for cyberattacks. In today's world, communication and information systems are becoming more indispensable to society and because of that security has become more critical and challenging when many contents, devices, and users get connected to the public Internet. This trend will inevitably continue in the future.

In the wake of such cyber threat landscape and cyberattacks, this symposium welcomes manuscripts on all aspects of the modeling, design, implementation, deployment, and management of security algorithms, protocols, architectures, and systems. Furthermore, contributions devoted to the evaluation, optimization, or enhancement of security and privacy mechanisms for current technologies, as well as devising efficient security and privacy solutions by leveraging futuristic technologies, are solicited. High quality papers reporting on applications of communications theory from both industry and academia are encouraged.

Topics of Interest

The Communication & Information System Security Symposium seeks original contributions in the following topical areas, plus others that are not explicitly listed but are closely related:

- Applied cryptography for cyber, information, and network security
- Attack detection and prevention in communication systems
- Authentication protocols and key management
- Blockchain applications in communication systems
- Cellular network security and privacy (5G, 5G beyond, and 6G)
- Data center and distributed systems security
- Cloud, edge, fog, and device security
- Connected and autonomous vehicle security
- Emerging technologies and methods for information, cyber, and network security

- Formal trust models, security modeling, and design of secure protocols
- Future Internet Architecture (FIA) security and privacy
- Internet of Things security and privacy
- Malware detection and damage recovery
- Security and privacy in Age of Information (AoI)
- Security and privacy in digital twin
- Security for mobile and wireless communications
- Security in smart grid communications
- Trust management in networks through emerging technology
- UAV and vehicular network security
- Social network security
- Artificial Intelligence (ML, DL, and FL) for network security
- Secure and trustworthy artificial intelligence in networking

Journal Publication Opportunity

The authors of selected papers from this symposium will be invited to submit an extended version of their work for fast-track review and possible publication in the IEEE Open Journal of the Communications Society.

Important Dates

Paper Submission: 11 October 2023

Notification: 18 January 2024

Camera Ready and Registration: 15 February 2024

How to Submit a Paper

All papers for technical symposia should be submitted via EDAS. Full instructions on how to submit papers are provided on the IEEE ICC 2024 website: <https://icc2024.ieee-icc.org/>
